The Anatomy of Mans body.

Aſtra regunt homines, ſed regit aſtra Deus.

To find the time of the Tide in a more exact manner than heretofore.

Days after the Chango, or Full, the Moon is South at

0	1	2	3	4	5	6	7	
12	12 48	1 36	2 24	3 12	4 0	4 48	5 36	

Days after either of the Quarters, the Moon is South at

0	1	2	3	4	5	6	7	
6	6 48	7 36	8 24	9 12	10 0	10 48	11 36	

First find the new moon, full, or quarter, in the kalender; then count how many days are paſt either of thoſe, and under the ſame number of days paſt, you ſhall here ſee the time that the moon will be ſouth the ſame day; Then look for the Haven or Port you deſire, and where the hours and quarters ſtand before the ſame, there it is high-water: as many hours and quarters before the time above found: But where the houſs and quarters ſtand after the place, there it is high-water ſo long after the time firſt found. *As for example:*

The Moon being five days paſt the change, and ſo five days old, I find in the table, that five days after the change the Moon is ſouth at four a clock, which makes full ſea at Quinborough, Southampton, &c. But at Plimouth, Dover, Harwich, an hour and an half ſooner; that is, at two a clock and thirty minutes: but at London, Tinmouth, and Amſterdam, three hours after.
